Summary

AI Engineer specializing in **LLM-powered systems**, **RAG pipelines**, and **agentic workflows**. Delivered production-grade AI systems using **LangChain**, **LangGraph**, **CrewAI**, and modern LLM APIs in real-world deployment environments. Experienced in designing **multi-step reasoning systems**, **hybrid retrieval**, and **memory-augmented AI applications** with strong focus on scalability, security, and reliability.

Experience

IQ Innovation Hub LLP

May 2025 – Present

Software Engineer

Pune, India

- **Meeting Summarization:** Built an AI meeting intelligence system processing 100+ sessions (**recorded + live** via Zoom/Teams bots), generating transcripts and **LLM-driven summaries** of topics, decisions, and tasks with 92%+ accuracy, **reducing manual effort by 70%** on production queries and accelerating meeting analysis workflows by 3×.
- **RAG Architecture:** Designed **RAG-based workflows** using **hybrid retrieval** (vector + keyword search), **improving response relevance by 40%** and reducing hallucinated outputs.
- **Excel Chatbot (Agentic System):** Developed a **LangGraph-based assistant** handling multi-sheet Excel datasets, using **BM25 + Pinecone vector search** with **re-ranking**, increasing answer precision by 45%.
- **Document Extraction:** Engineered a **LangChain + PDFPlumber pipeline** extracting structured data from unstructured PDFs with **99% accuracy**, handling inconsistent and noisy formats.
- **Performance Optimization:** Applied **Redis caching** and optimized query pipelines, reducing repeated inference latency by **50%** and increasing system throughput under load.
- **Security & Guardrails:** Enforced **prompt validation**, **input sanitization**, and **XSS protection**, reducing unsafe or malformed outputs by 60%.
- **Deployment & Scalability:** Containerized production AI services using **Docker** and integrated CI/CD pipelines, **lowering deployment time by 40%** and ensuring reproducible environments.

Projects

Git-Talk AI | *React, FastAPI, LangChain, Gemini API, Pinecone*

[GitHub](#) | [Live](#)

- Created a **RAG-based system** that allows users to chat with any GitHub repository (public and private) and understand its codebase, **cutting developer onboarding time by 50%**.
- Established pipelines for **document ingestion**, **embeddings generation**, **similarity search**, and **vector retrieval**, increasing retrieval accuracy by **40%**.
- Leveraged **LLM prompting**, GitHub APIs, and retrieval workflows to generate code summaries, suggestions, and architectural insights and diagrams, reducing manual code exploration effort by 60%.

AI-Enabled E-Commerce Platform | *Python, Django, JavaScript, SQLite, Scikit-learn, Docker*

[GitHub](#)

- Delivered a full-stack **e-commerce platform** with AI-driven personalization enabling tailored product recommendations, smart bundling, and AI-generated content, increasing simulated **user engagement by 35%**.
- Combined hybrid recommendations and NLP content generation to boost relevance by 30%.

Technical Skills

Languages:	Python, Java, SQL, JavaScript, HTML5, CSS3
GenAI & LLM:	LangChain, LangGraph, CrewAI, Prompt Engineering, Embeddings
Databases:	Pinecone, FAISS, PostgreSQL, MySQL, MongoDB, Redis
Frameworks:	FastAPI, Spring Boot, React, REST APIs, GraphQL, gRPC
Cloud & DevOps:	AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes
Developer Tools:	Git, GitHub, Bitbucket, Postman, Swagger, Jira

Education

Centre for Development of Advanced Computing

Aug 2024 – Feb 2025

Post Graduate Diploma - Advance Computing

Pune, India

- Percentage: 72

AISSMS College of Engineering

Aug 2020 – June 2024

Bachelor of Engineering (B.E) - Computer Engineering

Pune, India

- CGPA: 8.37

Honors and Awards

- Achieved 6th place among 100+ teams in Ideathon 21-22 conducted by Institution Innovation Council - Oct 2021
- Second Runner-Up at Cybertronic 2K22 organized by Zeal College - Dec 2022
